## HOW TO USE THIS PLANNER

## A Practical Guide Before You Begin

|   |                                                                                                      |
|---|------------------------------------------------------------------------------------------------------|
| 1 | Follow the 30-day sequence. The order is priority-first, not chapter order. Resist the urge to skip. |
| 2 | Each day card has 4 tasks. Complete all 4 before moving on. Tick the checkboxes in print.            |
| 3 | PYQs (Past Year Questions) are non-negotiable. Solve them after each chapter – same day.             |
| 4 | Mock Tests on Days 7, 14, 26, 27, 28. These simulate exam pressure – treat them as real tests.       |
| 5 | The Note in each card contains strategy. Read it before you start the day.                           |
| 6 | SKIP-priority chapters mean very low ROI. Do them only after everything else is done.                |

## SCORE TARGETS

| Subject      | Questions  | Marks      | Target Score | Benchmark                           |
|--------------|------------|------------|--------------|-------------------------------------|
| Physics      | 45         | 180        | 120–140      | Top 10%                             |
| Chemistry    | 45         | 180        | 130–160      | Most scorable                       |
| Biology      | 90         | 360        | 300–340      | Highest ROI                         |
| <b>Total</b> | <b>180</b> | <b>720</b> | <b>600+</b>  | <b>Approx 650+ for top colleges</b> |

## PHYSICS

## Physics Question Analysis (2021–2025)

| Chapter                               | 5Y Total | Avg/Yr | Weight | Priority |
|---------------------------------------|----------|--------|--------|----------|
| Current Electricity                   | 22       | 4      | 9%     | HIGH     |
| Electrostatic Potential & Capacitance | 16       | 3      | 7%     | HIGH     |
| Semiconductor Electronics             | 15       | 3      | 6%     | HIGH     |
| Ray Optics & Optical Instruments      | 14       | 3      | 6%     | HIGH     |
| Units and Measurements                | 14       | 3      | 6%     | MED      |
| Moving Charges & Magnetism            | 13       | 3      | 5%     | MED      |
| Gravitation                           | 10       | 2      | 4%     | MED      |
| Rotational Motion                     | 10       | 2      | 4%     | MED      |
| Waves                                 | 3        | 1      | 1%     | LOW      |
| Mathematical Tools & Vectors          | 0        | 0      | 0%     | SKIP     |

Key Insight: Electricity and Optics are the safest scoring areas. Waves shows very low repetition.

## CHEMISTRY

## Chemistry Question Analysis (2021–2025)

| Chapter                               | 5Y Total | Avg/Yr | Weight | Priority |
|---------------------------------------|----------|--------|--------|----------|
| Aldehydes, Ketones & Carboxylic Acids | 19       | 4      | 9%     | HIGH     |
| Organic Chemistry – Basic Principles  | 14       | 3      | 7%     | HIGH     |
| Hydrocarbons                          | 13       | 3      | 6%     | HIGH     |
| Chemical Bonding                      | 13       | 3      | 6%     | HIGH     |
| Coordination Compounds                | 13       | 3      | 6%     | HIGH     |
| Equilibrium                           | 12       | 2      | 6%     | MED      |
| Chemical Kinetics                     | 12       | 2      | 6%     | MED      |
| Alcohols, Phenols & Ethers            | 7        | 1      | 3%     | MED      |
| Redox Reactions                       | 5        | 1      | 2%     | LOW      |
| p-Block Elements (XI)                 | 3        | 1      | 1%     | LOW      |

Key Insight: Organic Chemistry is highly rewarding. Learning reactions properly fetches easy marks every year.

## BOTANY

## Botany Question Analysis (2021–2025)

| Chapter                                 | 5Y Total | Avg/Yr | Weight | Priority |
|-----------------------------------------|----------|--------|--------|----------|
| Molecular Basis of Inheritance          | 35       | 7      | 15%    | HIGH     |
| Principles of Inheritance & Variation   | 22       | 4      | 9%     | HIGH     |
| Cell Cycle & Cell Division              | 20       | 4      | 8%     | HIGH     |
| Plant Kingdom                           | 17       | 3      | 7%     | HIGH     |
| Sexual Reproduction in Flowering Plants | 15       | 3      | 6%     | MED      |
| Cell – The Unit of Life                 | 14       | 3      | 6%     | MED      |
| Plant Growth & Development              | 14       | 3      | 6%     | MED      |
| Biodiversity & Conservation             | 12       | 2      | 5%     | MED      |
| Ecosystem                               | 12       | 2      | 5%     | MED      |
| The Living World                        | 1        | 0      | 0%     | SKIP     |

*Key Insight: Genetics alone contributes nearly one-fourth of Botany questions. Skipping it is risky.*

## ZOOLOGY

## Zoology Question Analysis (2021–2025)

| Chapter                                | 5Y Total | Avg/Yr | Weight | Priority |
|----------------------------------------|----------|--------|--------|----------|
| Biotechnology – Principles & Processes | 32       | 6      | 13%    | HIGH     |
| Animal Kingdom                         | 26       | 5      | 10%    | HIGH     |
| Biomolecules                           | 25       | 5      | 10%    | HIGH     |
| Structural Organisation in Animals     | 24       | 5      | 10%    | HIGH     |
| Human Reproduction                     | 21       | 4      | 8%     | HIGH     |
| Biotechnology & Its Applications       | 20       | 4      | 8%     | HIGH     |
| Human Health & Disease                 | 17       | 3      | 7%     | MED      |
| Locomotion & Movement                  | 15       | 3      | 6%     | MED      |
| Breathing & Exchange of Gases          | 8        | 2      | 3%     | MED      |

*Key Insight: Biotechnology and Animal Kingdom are the most consistent scoring chapters in Zoology.*

## WEEK 1 · Physics Focus

## DAY 01 W1 PHYSICS

## Current Electricity

- NCERT Ch 3 – full reading
- Kirchhoff's laws + numericals
- PYQ: 2021–25 (Current Electricity)
- Formula sheet entry

9% weightage · Most repeated Physics chapter · Do NOT skip

## DAY 02 W1 PHYSICS

## Electrostatic Potential &amp; Capacitance

- NCERT Ch 2 – full reading
- Capacitor circuits + energy stored
- PYQ: 2021–25
- Formula sheet entry

7% · Conceptual + numerical mix · Focus on Gauss's law

## DAY 03 W1 PHYSICS

## Semiconductor Electronics + Ray Optics

- NCERT Ch 14 – Logic gates, diode
- NCERT Ch 9 – mirror/lens formula
- PYQ: both chapters
- Mini test: 20 MCQs

12% combined · Both chapters have predictable question patterns

## DAY 04 W1 PHYSICS

## Units &amp; Measurements + Moving Charges

- Dimensional analysis practice
- Biot-Savart + Ampere's law
- PYQ: both
- Formula sheet

11% combined · Units often appears in assertion-reason format

## DAY 05 W1 PHYSICS

## Gravitation + Rotational Motion

- Kepler's laws + satellite motion
- Moment of inertia table
- PYQ: both chapters
- Formula sheet

8% combined · Numericals are formula-driven – memorise formulas

## DAY 06 W1 PHYSICS

## Waves + Full Physics Revision

- NCERT Ch 14 – quick read
- Revision: all 8 Physics chapters
- Redo all incorrect PYQs
- Self-score check

Waves: 1% – light revision only. Spend 70% of day on revision

## DAY 07 W1 MOCK TEST

## Physics Mock Test Day

- 45-question Physics timed test (60 min)
- Score analysis & error log
- Revise incorrect concepts
- Plan weak areas for later

Target: 120+ / 180 in Physics · Log every mistake by chapter

## WEEK 2 · Chemistry Focus

## DAY 08 W2 CHEMISTRY

## Aldehydes, Ketones &amp; Carboxylic Acids

- NCERT Ch 12 – reactions focus
- Named reactions: Aldol, Cannizzaro etc.
- PYQ: 2021–25
- Reaction mechanism sheet

9% · Highest in Chemistry · Reaction-based – learn mechanisms, not rote

## DAY 09 W2 CHEMISTRY

## Organic Chemistry Basic Principles

- Nomenclature + Isomerism
- Reaction intermediates (carbocation, carbanion)
- PYQ: 2021–25
- Concept map

7% · Foundation for all Organic chapters – master this first

## DAY 10 W2 CHEMISTRY

## Hydrocarbons + Chemical Bonding

- Alkane/Alkene/Alkyne reactions
- VSEPR + hybridisation + MO theory
- PYQ: both
- Formula sheet

12% combined · Chemical Bonding appears every year without fail

## DAY 11 W2 CHEMISTRY

## Coordination Compounds + Equilibrium

- Werner's theory + IUPAC naming
- $K_p$ ,  $K_c$ , Le Chatelier's principle
- PYQ: both
- Mini test: 20 MCQs

12% combined · Coordination is highly scoring – named reactions too

## DAY 12 W2 CHEMISTRY

## Chemical Kinetics + Alcohols, Phenols &amp; Ethers

- Rate laws + Arrhenius equation
- Williamson synthesis + reactions
- PYQ: both chapters
- Formula sheet

9% combined · Kinetics: numericals are standard format

## DAY 13 W2 CHEMISTRY

## Redox + p-Block + Full Chemistry Revision

- Oxidation number + balancing
- Key p-Block reactions (Group 15–18)
- Revision of Organic chapters
- Redo wrong PYQs

Low weightage chapters – 1 hour max. Spend rest on Organic revision

**DAY 14                      W2                      MOCK TEST**
**Chemistry Mock Test Day**

- 45-question Chemistry timed test (60 min)
- Score & error analysis
- Revise weak Organic reactions
- Update reaction sheet

Target: 120+ / 180 · Organic usually 25+ questions – do not neglect

**WEEK 3 · Biology Focus**
**DAY 15                      W3                      BOTANY**
**Molecular Basis of Inheritance**

- NCERT Ch 6 – DNA structure to translation
- Replication + Transcription diagrams
- PYQ: 2021–25 (35 questions!)
- Concept map

15% of Botany · Single most important chapter · ~7 questions/year

**DAY 16                      W3                      ZOOLOGY**
**Biotechnology – Principles & Processes**

- NCERT Ch 11 – rDNA technology
- PCR + Gel electrophoresis steps
- PYQ: 2021–25 (32 questions!)
- Diagram list

13% of Zoology · ~6 questions/year · Diagrams are frequently tested

**DAY 17                      W3                      BIOLOGY**
**Principles of Inheritance (Bot) + Animal Kingdom (Zoo)**

- Mendelian genetics + deviations
- Phylum classification + key features
- PYQ: both chapters
- Flash cards: Animal phyla

19% combined · Animal Kingdom: learn distinguishing features per phylum

## DAY 18 W3 BIOLOGY

**Cell Cycle & Division (Bot) + Biomolecules (Zoo)**

- Mitosis vs Meiosis diagrams
- Enzyme kinetics + protein structure
- PYQ: both chapters
- Mini test: 20 MCQs

18% combined · Cell division diagrams appear every year

## DAY 19 W3 BIOLOGY

**Structural Organisation in Animals + Human Reproduction**

- Cockroach anatomy diagrams
- Reproductive system diagrams + hormones
- PYQ: both chapters
- Diagram revision

18% combined · Both are highly diagram-based – draw every diagram

## DAY 20 W3 BIOLOGY

**Plant Kingdom (Bot) + Human Health & Disease (Zoo)**

- Plant classification: Algae to Angiosperms
- Diseases: causative agents + symptoms
- PYQ: both
- Comparison tables

14% combined · Plant Kingdom: life cycles are frequently tested

## DAY 21 W3 BIOLOGY

**Sexual Repro (Bot) + Biotech Applications + Cell Unit of Life**

- Pollination types + double fertilisation
- Transgenic organisms + applications
- Cell organelle functions
- PYQ: all three

Covers remaining high-value Biology chapters – no chapter below 6%

**WEEK 4 · Mock Tests & Revision**

**DAY 22                      W4                      BIOLOGY**
**Remaining Biology + Ecology Revision**

- Plant Growth & Development ■
- Biodiversity & Conservation ■
- Ecosystem revision ■
- Redo all Biology PYQs incorrectly answered ■

*Ecology (Bio): 10% combined – often underestimated. Quick but important*

**DAY 23                      W4                      REVISION**
**Full Physics Revision Sprint**

- Revise all formula sheets ■
- Chapter-wise 10 MCQ sets ■
- Focus: Current Electricity + Electrostatics ■
- Error log review ■

*Physics is most formula-dense subject – dedicated revision is essential*

**DAY 24                      W4                      REVISION**
**Full Chemistry Revision Sprint**

- Organic reaction mechanisms review ■
- Inorganic: Chemical Bonding + Coordination ■
- Physical: Kinetics + Equilibrium numericals ■
- Update notes ■

*70% Organic, 20% Physical, 10% Inorganic – match NEET's actual split*

**DAY 25                      W4                      REVISION**
**Full Biology Revision Sprint**

- Genetics + Molecular Biology revision ■
- All Biology diagrams quick-draw ■
- Biotechnology revision ■
- Formula and classification tables ■

*Biology = 90 questions · Each mark counts · Revise diagrams carefully*

**DAY 26                      W4                      MOCK TEST**
**Full NEET Mock Test 1**

- Complete 180-question timed test (3 hrs 20 min) ■
- Score: Physics + Chemistry + Biology separately ■
- Detailed error analysis ■
- Identify top 3 weak chapters per subject ■

*Simulate exam conditions · No breaks · Mark sheet analysis after*

**DAY 27                      W4                      MOCK TEST**
**Full NEET Mock Test 2**

- Complete 180-question timed test
- Compare with Mock 1 scores
- Focused revision: weak areas only
- Attempt alternate questions in weak chapters

*Track improvement from Mock 1 · Target 600+ overall*

**DAY 28                      W4                      MOCK TEST**
**Full NEET Mock Test 3 + Deep Analysis**

- Complete 180-question timed test
- 3-test comparison score chart
- Chapter-wise accuracy table
- Final weak-area hit-list

*Build stamina · Know your strongest and weakest chapter by now*

**FINAL DAYS · Exam Ready**
**DAY 29                      FINAL                      REVISION**
**Targeted Weak Area Revision**

- Revise ONLY chapters below 50% accuracy
- Re-read NCERT lines for Biology
- Organic named reactions quick-run
- Physics formula last look

*Do NOT start new topics · Consolidate existing knowledge*

**DAY 30                      FINAL                      EXAM PREP**
**Light Revision + Mental Preparation**

- Quick scan: all formula sheets (1 hr)
- Light Biology read: key diagrams
- No new MCQs today
- Sleep 8 hrs · Light meal · Report to exam hall early

*Confidence > cramming on Day 30 · Trust your 29 days of preparation*

## QUICK REFERENCE

## Exam Day Checklist &amp; Final Reminders

|   |                                                                                                       |
|---|-------------------------------------------------------------------------------------------------------|
| ■ | Admit card + valid photo ID (both mandatory)                                                          |
| ■ | Reach exam centre at least 60 minutes before reporting time                                           |
| ■ | Carry transparent water bottle, analogue watch (no digital allowed)                                   |
| ■ | Start Biology first – highest marks, most familiar                                                    |
| ■ | Attempt all questions – NEET has +4 / -1 marking. Never leave a question you've narrowed to 2 options |
| ■ | Physics: save numerical-heavy questions for last – do conceptual ones first                           |
| ■ | Chemistry: Organic questions are usually faster. Do them early in the Chemistry section               |
| ■ | Flag and revisit: mark uncertain answers, revisit in last 15 minutes                                  |
| ■ | Stay calm. You have prepared. Trust the process.                                                      |

## A NOTE FROM THE PLANNER

This planner was built on one principle: **not all chapters are equal**, and your time shouldn't be spent as if they are. The 5-year PYQ data tells a clear story – certain chapters appear year after year, while others barely show up. This 30-day plan puts your effort exactly where the marks are. Stick to it, solve PYQs daily, and simulate exam conditions on mock test days. The goal isn't just to study more – it's to study smarter. Best of luck.

— Shiva Rathore, Founder · Uni Organisation
